Subject: Let's celebrate World Water Day and terminate the OPG DGR that exposes our World's Water Source to dangerous radioactive nuclear waste forever!

Importance: High

March 22, 2017

Hi Minister McKenna & Deep Geologic Repository Project Manager:

Let's celebrate World Water Day and terminate the OPG DGR that exposes our World's Water Source to dangerous radioactive nuclear waste forever!

1. Today we all celebrate World Water Day.
2. At the same time, OPG, CEAA, and CNSC hope to celebrate dumping dangerous radioactive nuclear waste underground on the shores of the Great Lakes, forever exposing our World's Water Source to possible ruin.
3. Citizens and Taxpayers demand answers as to why a nuclear waster dump on the shores of Lake Huron? Particularly related to the necessity and urgency requirements for an underground nuclear waste dump [DGR] when spent fuel remains on the surface, clothes and rags need no special handling and no special protection and have been and continue to be safely stored on the surface for over 50 years, and OPG inexplicably refuses to check out any DGR site that does not expose the Great Lakes forever!
4. Just ask the Citizens of Flint what they think about nuclear waste contaminating their drinking water.

Most Respectfully,

John Mann
