

YTH

Mrs. Fell's Grade 3/4 Class

The Honourable Catherine McKenna MP
Environment and Climate Change Canada
200 Sacré-Coeur Boulevard
Gatineau QC K1A 0H3

RECEIVED
MAY 10 2017

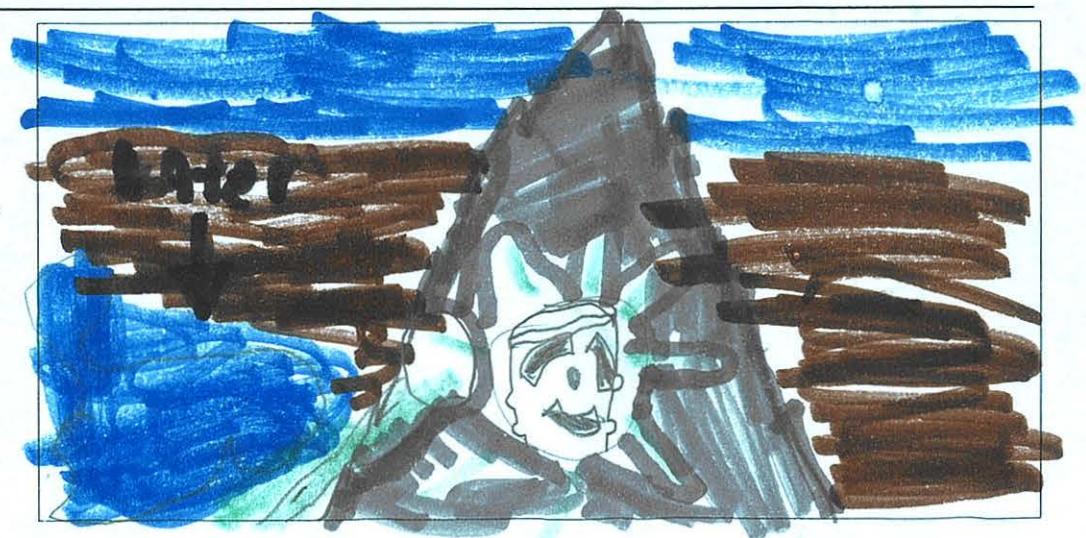

REC'D - DCU - DOE
MAY 10 2017
RECU - UCM - MDE

Dear Minister Catherine McKenna,

I would like to talk to you about nuclear waste and where to put it.
you should get this waste away from everyone so that we can stay
healthy and survive. I think putting nuclear waste in the ground
is bad because it can leak and melt the limestone and pour into
the water and we can die. so please move the waste away from us.
Thank you for listening to me.

Sincerely,

Ryann

Mrs. Fell's Grade 3/4 Class

Gatineau QC K1A 0H3

Dear Minister Catherine McKenna,

I'd like to talk to you about the nuclear waste near
the Great Lake's and where to put it. I think the nuclear
waste is bad or harmful because it can cause hair loss,
Cancer and other type's of cancer, and it is close to
water and people and can ruin water activities please do
something now. Thank you for listening. U

Sincerely,

Jubany

Mrs. Fell's Grade 3/4 Class

The Honourable Catherine McKenna MP
Environment and Climate Change Canada

Gatineau QC K1A 0H3

Dear Minister Catherine McKenna,

I'd like to talk to you about the nuclear waste near the Great Lakes and where to put the nuclear waste. I think the nuclear waste is bad for everyone and can be harmful to where you are going to put the nuclear waste. It can leak in to the Great Lakes and they can get contaminated. I think it should go where it can be dealt with. What do you think? Thank you for listening.

Sincerely,

Jalia

Mrs. Fell's Grade 3/4 Class

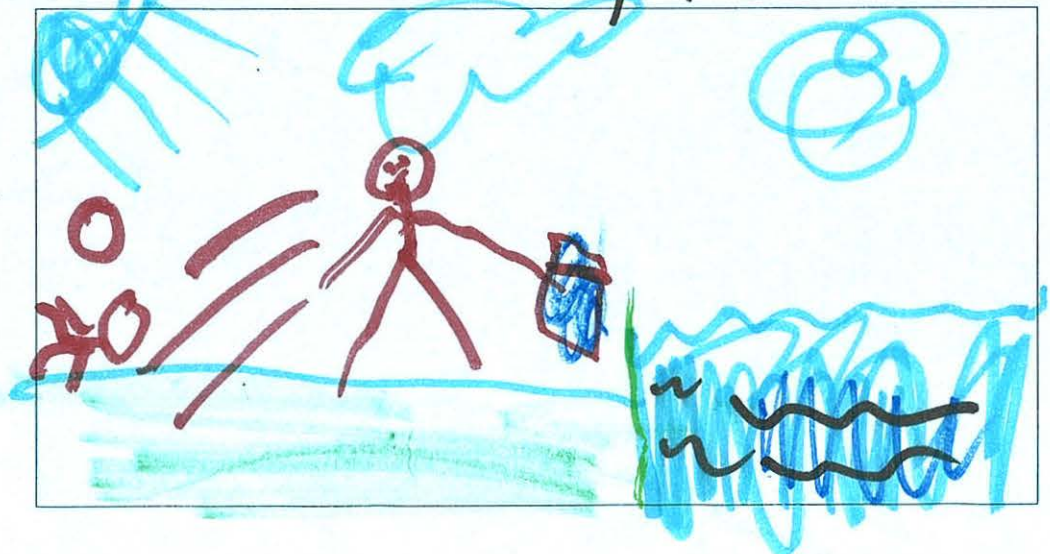

The Honourable Catherine McKenna MP
Environment and Climate Change Canada

Gatineau QC K1A 0H3

Dear Minister Catherine McKenna,

If you put the pollution in the Great Lakes, it
will kill the animals like fish. Other animals affected
and deers
by the nuclear waste would include bears[^] because they
drink out of the water. The Earth would be dirty as
the pollution^{would} ~~will~~ spread. Other forms of pollution that need to
be stopped include gas fumes that come out of car exhausts.
care
Take[^] of the Earth and no more pollution!

Sincerely,

Tessa

The Honourable Catherine McKenna MP
Environment and Climate Change Canada
200 Sacré-Coeur Boulevard
Gatineau QC K1A 0H3

Dear Minister Catherine McKenna,

I'd like to talk to you about the nuclear waste near the Great Lakes and where to put it. You should put it somewhere far away because it's not good to put the nuclear waste near the water. It's going to make the water bad to drink and then it will harm us and then kill us because we're drinking it. Then we are going to die from the nuclear waste and all the fish will die, so put the nuclear waste somewhere far away and just put it in metal containers and drive it all away somewhere far away from us. Thank you for listening.

Sincerely,

Madison

Dear Minister Catherine McKenna,

I would like to talk to
you about the nuclear waste near
the great lakes and where
to put it. I think you could
put it in space or else the
great lakes will be dead.
We need to act now.

Sincerely,
Tristan

Gatineau QC K1A 0H3

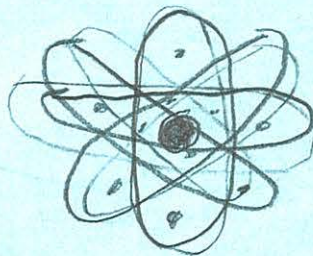

Dear Minister Catherine McKenna,

I want to talk to you about nuclear-waste and where to put it.
I want you to watch what people are putting into our water.
They are destroying living plants and animals. If it goes into
our water that we drink it could cause cancer-sickness-diseases that
could eventually kill us. They are putting this stuff in the ground so it could
make flowers and other crops die also - and living creatures on grass
lands. Please put the waste somewhere else than we live.
Thanks!

Thank you

Sincerely,

Mildred

Gatineau QC K1A 0H3

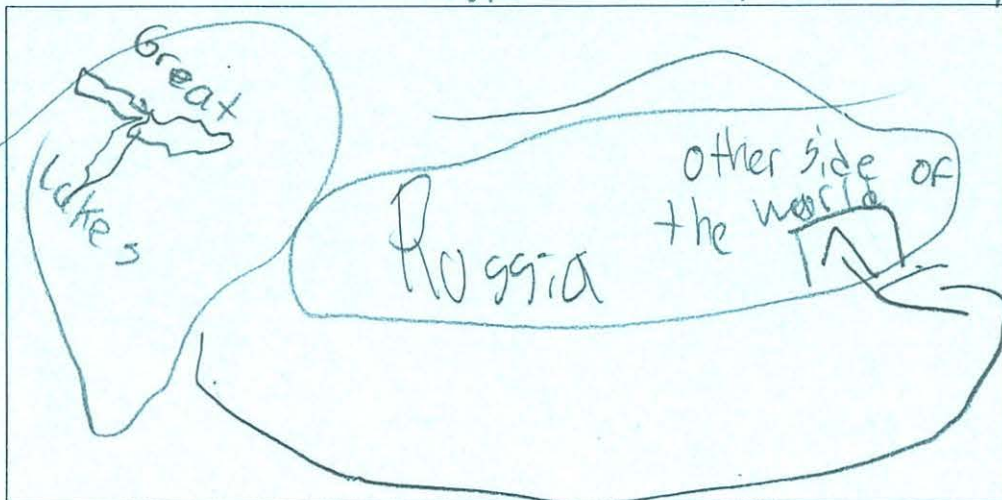

Dear Minister Catherine McKenna,

Please don't let them dump Nuclear Waste in the Great Lakes. I love water, and we need water to stay healthy and refreshed. The nuclear waste will kill us and you if we or you drink it. Tell them they should put it far away from any thing humans go near, put it in the ground by a dead tree or something like that. Don't say yes to them say no for a better future and better water for the next generation. It's the only fresh water in the world and I and you want clean water so please say

No to that.

Sincerely,

Tianna⁰⁰

Dear Minister Catherine McKenna,

Hi I'd like to talk to you about the dumping of Nuclear waste. Why put it near the Great Lakes? Because if it spills it will go to the Great Lakes and the water will get everyone sick then everyone won't be able to go to work. please put the waste somewhere else. Thanks you.

Sincerely,

Kent

Gatineau QC K1A 0H3

Dear Minister Catherine McKenna,

I'D like to talk to you about putting the nuclear waste by the Great Lakes. It's bad because if it pollutes the water there is a chance it can kill humans and animals. I want it to be taken care of now! The nuclear waste will spoil fun things such as swimming and playing in the water. It can also kill people if they drink the nuclear water. Thank you for listening.

Sincerely,

Julia

Dear Minister Catherine McKenna,

My name is Marissa and I am in Grade Three. I want to talk to you about the water in the Great Lakes. I don't think it is a good idea to dig a dig hole beside Lake Huron to bury nuclear waste because it is too close to people and animals. Please find another place to dump toxic wastes.

Sincerely,

Marissa
