Subject: RE: Requesting Consolidated Listing of Errata and/or Design Changes in OPG Submissions

Debra,

A Tracking Table has been submitted to the Panel with the submission of the last sub-set of responses to a set of Panel Information Requests. The latest update to the Tracking Table is dated May 10, 2013 and can be found on the CEAA registry as item # 1048

(<http://www.ceaa.gc.ca/050/documents/p17520/89260E.pdf>).

The Tracking Table is organized on a document-by-document basis and identifies design updates, corrections, additional information and clarifications that have been provided to the Panel associated with a particular submitted document. These include the information in the letters on the CEAA Registry as items #335 and #336 as well as from responses to Information Requests and from Technical Information Session Undertakings. No additional design updates have been provided other than those identified in CEAA Registry item #336.

I hope this provides the clarification requested.

Frank

Allan and Frank

Please see the message below from Northwatch. Could you please provide an answer to the question in the last paragraph?

Thank you,

Debra Myles

Subject: Requesting Consolidated Listing of Errata and/or Design Changes in OPG Submissions

Debra,

On February 10th, 2012 Ontario Power Generation provided the Joint Review Panel with six sets of design changes to the Deep Geological Repository, which are described in CEAR#336, available online at <http://www.ceaa.gc.ca/050/documents/54285/54285E.pdf>

Ontario Power Generation also provided CEAR# 335, which describes 23 errors in the documents submitted in April 2011 in support of their license application. The corrections document is online at <http://www.ceaa.gc.ca/050/documents/54285/54285E.pdf>.

Are there additional errata or further design changes that have been filed by Ontario Power Generation? Using the search function in the Registry I was not able to identify any additional changes / corrections, but would appreciate either confirmation that no additional design changes / updates or corrections / errata have been filed by Ontario Power Generation.

Thank you for your assistance,

Brennain
