Subject: RE: Northwatch Information Request on Decommissioning Wastes

Brennain

I am sorry for the delay in getting back to you on this request.

The Panel thanks you for the submission - it has been sent to the registry for posting. As you correctly note, the Panel closed the comment period on the EIS and licencing documents on May 24, 2013. As such, It will not be considering the proposed information request from Northwatch in reaching its decision on the adequacy of the information for the purpose of proceeding to a public hearing for the DGR project.

Regards,

Debra Myles

Subject: DGR: Northwatch Information Request on Decommissioning Wastes

Debra,

Attached is an additional information request related to decommissioning wastes, with several supporting attachments. As outlined in our cover letter, we understand that May 24th was the close of the public comment period related to the review of the conformity of the EIS and supporting information with the EIS guidelines, but information has emerged since May 24th which we believe to be reasonable cause for Northwatch to submit one additional Information Request, and for the Panel to forward this Request to Ontario Power Generation for response.

Thanks for forwarding this to the Panel on our behalf. I've sent the several documents as individual attachments. I opted for sending them singly to keep file size down, for ease of transmission. Please let me know if you'd rather I combined them into a single pdf file.

Regards,

Brennain

Ontario's Liberal government is "divesting" the Ontario Northland Transportation Commission, including shutting down our passenger rail service and selling off the rail yards and telecommunications, including Ontera. Ontera has been Northwatch's internet provider for many years, and it is with great regret that we prepare for the loss of this publicly owned asset and service. Please note that our email has changed to northwatch@northwatch.org. We will continue to be an Ontera customer and receive emails addressed to our longstanding "onlink.net" addresses as long as it is publicly owned.
