Subject: Request from the Deep Geologic Repository Joint Review Panel

Yves Leboeuf
Vice-President, Operations
Canadian Environmental Assessment Agency

Good morning Yves.

Over the course of the Deep Geologic Repository (DGR) project review, submissions have been received in the Outlook mailbox of the Joint Review Panel (dgr.review@ceaa-acee.gc.ca) that have been labelled as 'SPAM'. Please follow the link, below, for an explanation of the situation. This notice was provided to interested parties by the DGR Panel Secretariat.

[CEAR DOC#1084; May 22, 2013; Notice to Interested Parties from the Panel Secretariat concerning the anti-spam procedures that are applied to the Deep Geologic Repository electronic mailbox](#)

As you know, all submissions received by a Panel are sent to the Agency Registry Coordinator for posting on the Canadian Environmental Assessment Registry Internet site. The Registry Coordinator removes only personal identifiable information from a record before posting it to the appropriate project page on the Registry Internet site. As a result, some Email submissions received by the DGR Panel have been posted with the label 'SPAM' in the subject line.

These submissions to the DGR Panel are not SPAM (unsolicited bulk email) – they are essential records in the review are considered by the Panel as such. To avoid any appearance to the contrary, the Panel would like the Agency to remove the 'SPAM' label from the subject line of all existing Email records in the DGR registry. Further, the Panel requests that any label applied by the security software to future records sent for posting on the DGR registry be removed.

Thank you,

Debra Myles
