

# Coronavirus disease (COVID-19)

## Situation Report – 104

Data as received by WHO from national authorities by 10:00 CEST, 3 May 2020

This report has been reformatted to improve accessibility for persons with visual impairment.

### Highlights

WHO has recently updated the document on **Country Preparedness and Response Status for COVID-19**. The document highlighted that all countries are at risk and need to prepare for and respond to COVID-19. Each country is encouraged to plan its preparedness and response actions in line with the global Strategic Preparedness and Response Plan.

As Yemen confirms its first cases of COVID-19, **WHO's Regional Office for the Eastern Mediterranean issued a statement**, stressing that collective action and commitment is the only way to mitigate the pandemic. "As long as even one case is unidentified and not properly treated, isolated and contacts traced, COVID-19 will continue to pose a significant threat to the Yemeni people and the country's struggling health system".

WHO has recently published **FAQs for COVID-19 Supply Portal**. The COVID-19 Supply Portal is a purpose-built tool to facilitate national authorities and all implementing partners supporting COVID-19 National Action Plans to request critical supplies.

Since 15 April, WHO is providing **weekly update on COVID-19**, with the latest update published on 1 May. The report complements the daily situation reports, in addition to providing details on WHO funding mechanism.

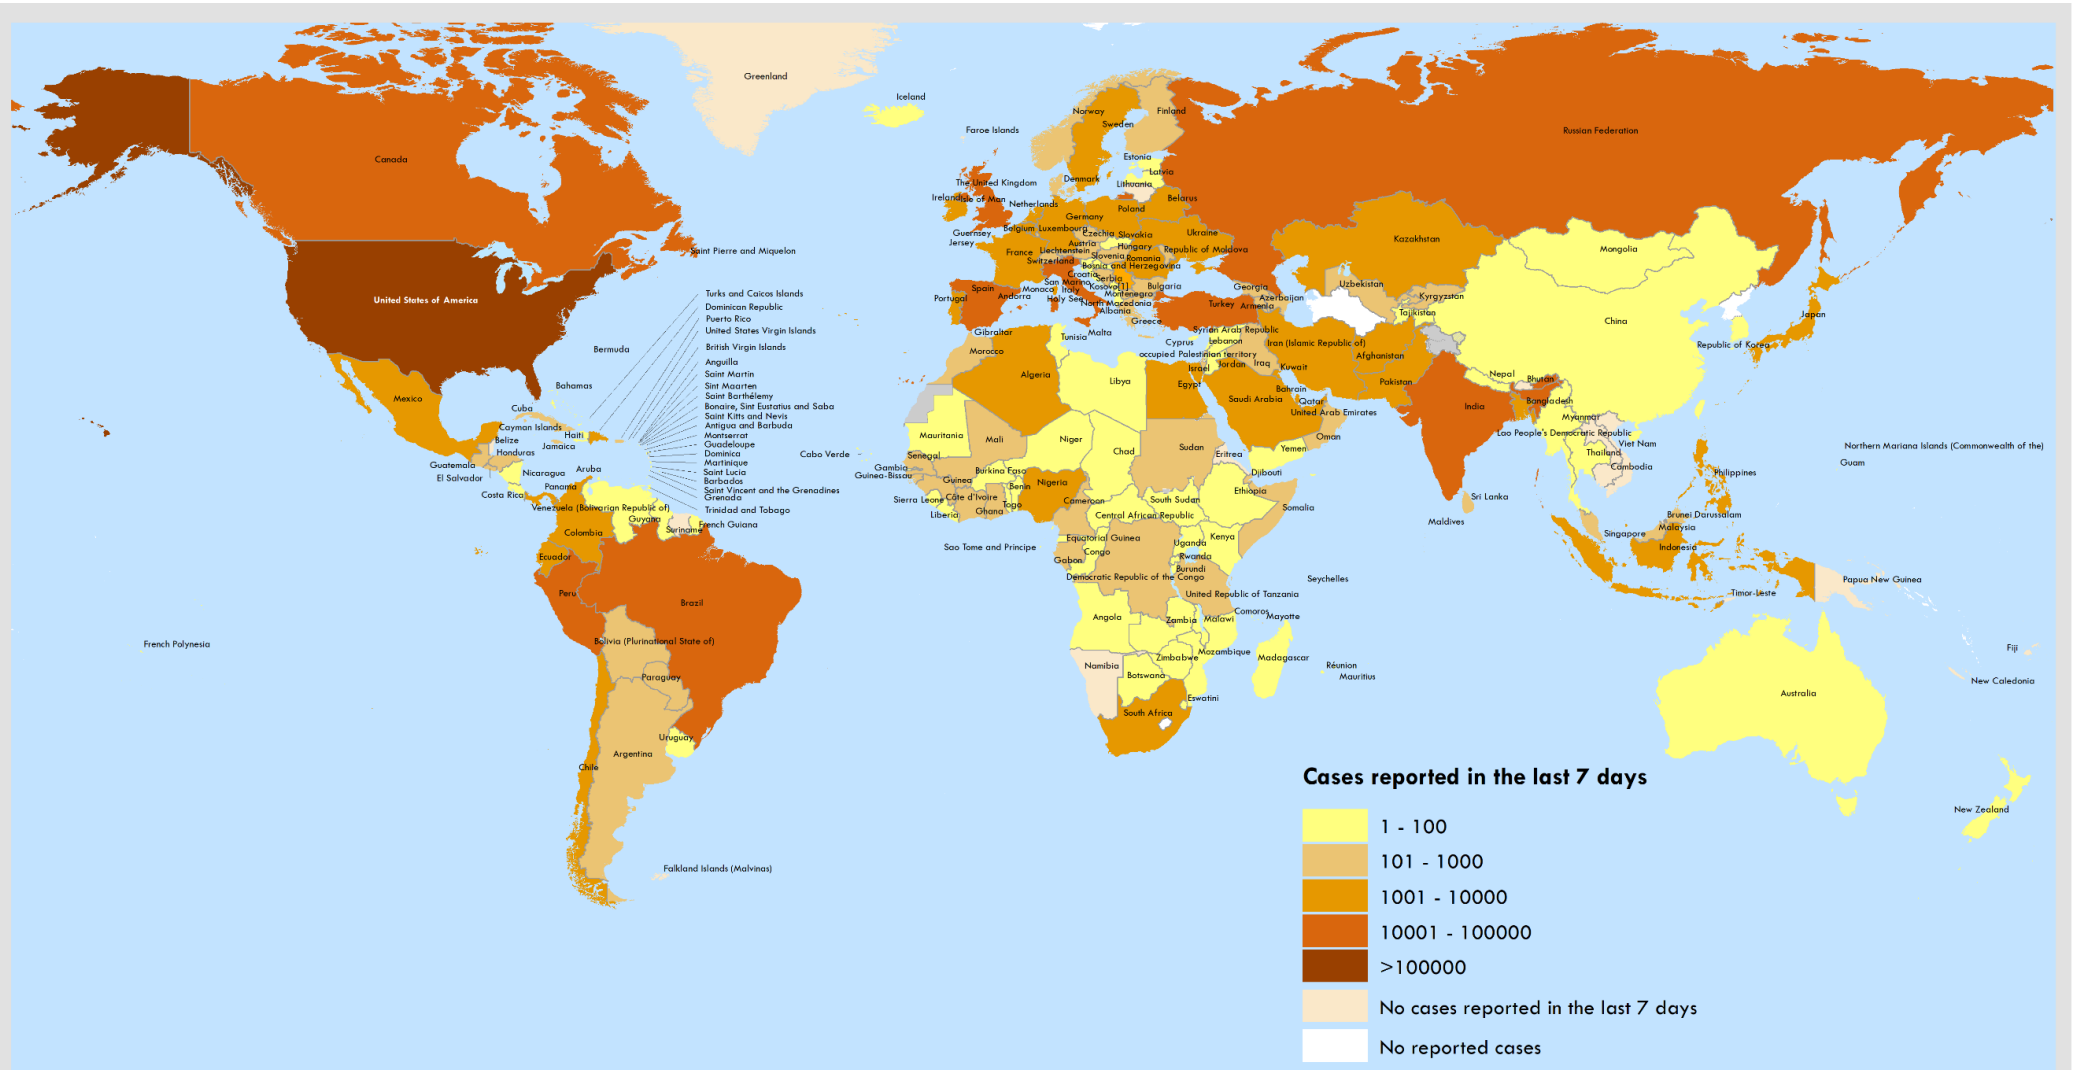

### Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

Globally	3 349 786 cases (82 763)	238 628 deaths (8657)
Africa	29 438 cases (1465)	1064 deaths (51)
Americas	1 384 641 cases (44 050)	78 409 deaths (6213)
Eastern Mediterranean	200 609 cases (5618)	7871 deaths (130)
Europe	1 518 895 cases (27 032)	142 667 deaths (2081)
South-East Asia	64 047 cases (3557)	2375 deaths (119)
Western Pacific	151 444 cases (1041)	6229 deaths (63)

# Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 27 April to 3 May\*\*

Data Source: World Health Organization  
 Map Production: WHO Health Emergencies Programme

## Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\) document](#) which includes surveillance definitions.

### Definition of COVID-19 death

COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

---

## Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

<sup>[1]</sup> All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999).

In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on [WHO case definitions](#) unless stated otherwise (see *Country, territory, or area-specific updates and errata*), and include both domestic and repatriated cases.

Other\*: includes cases and deaths reported under the international conveyance (Diamond Princess).

### Additional table notes

<sup>i</sup> Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis, may be revised as new information becomes available, and are based on the highest category reported. Differing degrees of transmission may be present within countries/territories/areas. Categories:

- No cases: with no confirmed cases (not shown in table).
- Sporadic cases: with one or more cases, imported or locally detected.
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures.
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area.
- Pending: transmission classification not been reported to WHO.

<sup>ii</sup> "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status.

### Country, territory, or area-specific updates and errata

Portugal – data retro-adjusted by national authorities.
