

## Extra Appendix 2: Reserve-Level Data for the Bottom-Up Approach

Note: The reserve GDP per capita estimates in this Appendix are developed using the national share of earnings in GDP from the top-down approach (0.473). This is almost identical to the national share of earnings in GDP based on the provincial-level bottom-up approach data (0.481) used in the paper.

Appendix Table 7A: Reserve-specific Population, Employment, Earnings and Gross Domestic Product for Newfoundland and Labrador
