Source: Statistics Canada CANSIM Table 383-0022

Note: This only includes privately-owned establishments. Publicly-owned establishments that provide health services are included in the non-business sector.

Note: Industry 62A includes: Ambulatory Health Care Services [621], Nursing and Residential Care Facilities [623], and Social Assistance [624].

Note: Labour input is obtained by chained-Fisher aggregation of hours worked of all workers, classified by education, work experience, and class of workers (paid workers versus self-employed and unpaid family workers) using hourly compensation as weights.

Note: Capital input measures the services derived from the stock of fixed reproducible business assets (equipment and structures), inventories, and land. It is obtained by chained-Fisher aggregation of capital stocks using the cost of capital to determine weights.

Note: Intermediate inputs are obtained from a chained-Fisher aggregation of energy, material and services inputs.

Note: Population aged 4 and over (or aged 12 and over for data from the Canadian Community Health Survey and National Population Health Survey, North component) who report that they have been diagnosed by a health professional as having asthma.

Note: There are no data for 2002.

Note: 'F' indicates that the datum were suppressed due to extreme sampling variability.

Note: 'E' indicates data should be interpreted with caution.

Table 26: Risk of Depression in Canada 1994-2001

	Total Number of Persons	% No risk of depression	% Possible risk of depression	% Probable risk of depression	% Risk of depression not stated
1994/1995	23,948,617	85.6	2.5	5.2	6.6
1996/1997	24,594,887	90.7	1.5	4.1	3.8
1998/1999	24,916,127	90.5	1.5	4.3	3.7
2000/2001	25,680,051	88.6	2.8	7.1	1.5

Source: CANSIM "Health Indicators" vol. 2007(1). Catalogue no. 82-221-XIE (Available from <http://www.statcan.ca/english/freepub/82-221-XIE/00604/about.htm>). Statistics Canada, Canadian Community Health Survey, 2000/01, health file; Statistics Canada, National Population Health Survey, 1994/95, 1996/97 and 1998/99, cross sectional sample, health file and North component

Note: Population aged 12 and over with the probability of 0.9 or greater of having experienced a major depressive episode in the past 12 months based on responses to the short-form Composite International Diagnostic Interview (CIDI). Respondents are classified according to the probability that they would have been diagnosed as having experienced a major depressive episode in the past 12 months, if they had completed the long-form CIDI.

Table 27: Mortality Rate per 100,000 by Selected Causes in Canada, 1979-2003

	Colorectal cancer	Lung cancer	Acute Myocardial Infraction (AMI)	Cerebrovascular diseases
1979	25.6	40.9	148.1	79.7
1980	25.0	42.2	143.3	76.1
1981	24.8	42.1	138.1	73.2
1982	23.6	44.8	132.7	69.4
1983	23.2	45.4	125.5	65.5
1984	23.6	47.4	120.5	62.7
1985	23.4	47.1	114.7	60.6
1986	22.9	47.6	111.8	59.4
1987	22.9	48.2	105.2	56.5
1988	22.5	50.2	100.7	55.6
1989	21.5	50.2	93.9	54.8
1990	21.1	49.9	88.0	51.6
