

# Appendix 5: Close Contact Tracing

## Worksheet<sup>1</sup>

When interviewing a case to identify potential close contacts, consider all individuals that could have had exposure since the case was symptomatic. Use the following activity prompts to help identify potential close contacts: work; school; visitors at home; volunteer activities; daycare; religious activities; social activities (restaurants, shopping); sports; visits to acute care settings, long-term care homes, retirement homes, medical labs, dentists, and other health care providers; contact with ill persons; and contact with birds/swine or other animals.
