

## **Epidemiologic Summary**

### COVID-19 in Ontario: January 15, 2020 to April 9, 2020

This report includes the most current information available from the integrated Public Health Information System (iPHIS) as of **4 p.m. April 9, 2020.** 

#### **Purpose**

This daily report provides an epidemiologic summary of COVID-19 activity in Ontario to date.

### **Highlights**

- There are 6,237 confirmed cases of COVID-19 in Ontario reported to date in iPHIS. This represents an increase of 478 confirmed cases from the previous report.
  - 45.3% of cases are male, 54.1% are female.
  - 37.6% of cases are 60 years of age and older.
  - Greater Toronto Area public health units account for 52.9% of cases.
- 12.6% of cases were hospitalized
- 222 deaths have been reported (please note there may be a reporting delay for deaths in iPHIS). This is an increase of 22 deaths from the previous report.
- Seventy-three outbreaks have been reported in long-term care homes.

### **Case Characteristics**

Table 1. Summary of cases of COVID-19: Ontario, January 15, 2020 to April 9, 2020

	Number	Percentage
Number of cases*	6,237	N/A
Change from previous report	478	8.3% increase
Gender: Male	2,827	45.3
Gender: Female	3,373	54.1
Ages: 19 and under	151	2.4
Ages: 20-39	1,574	25.2
Ages: 40-59	2,159	34.6
Ages: 60-79	1,510	24.2
Ages: 80 and over	837	13.4
Number of cases in health care workers	694	11.1

<sup>\*</sup> Cases and rates by public health unit is provided in Appendix A.

**Note:** 37 cases did not specify male or female. Six cases had an unknown age.

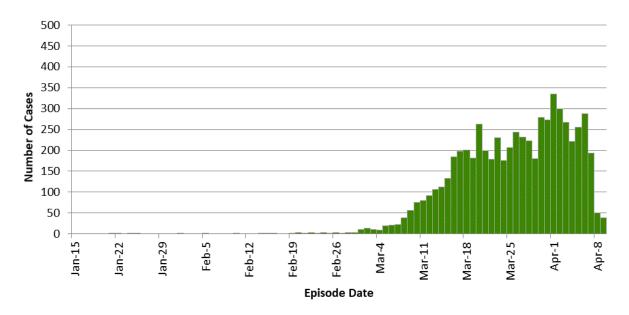

#### **Time**

Figure 1. Confirmed cases (n=6,237) of COVID-19 by reported date: Ontario, January 15, 2020 to April 9, 2020\*

<sup>\*</sup>Interpret case counts for the most recent days with caution due to reporting lags.

Figure 2. Confirmed cases (n=6,237) of COVID-19 by an approximation of symptom onset date\*: Ontario, January 15, 2020 to April 9, 2020\*\*

<sup>\*</sup> This date, referred to as episode date, is intended to approximate symptom onset date. It is calculated based on either the date of symptom onset, specimen collection/test date, or the date reported to public health.

<sup>\*\*</sup>Interpret case counts for the most recent days with caution due to reporting lags.

## **Exposure**

Table 2. Confirmed cases (n=6,237) of COVID-19 by exposure type: Ontario, January 15, 2020 to April 9, 2020

	Number	Percentage
Travel*	1,063	17.0
Close contact of a confirmed case	1,012	16.2
Community transmission	1,265	20.3
Information pending	2,897	46.4

<sup>\*</sup>Travel within the 14 days prior to becoming ill; travel locations are provided in Appendix A.

### Severity

Table 3. Confirmed cases (n=6,237) of COVID-19 by severity: Ontario, January 15, 2020 to April 9, 2020

	Number	Percentage
Cumulative deaths reported (please note there may be a reporting delay for deaths in iPHIS)	222	3.6
Change from previous report	22	11.0% increase
Deaths reported in ages: 19 and under	0	0.0
Deaths reported in ages: 20-39	1	0.1
Deaths reported in ages: 40-59	15	0.7
Deaths reported in ages: 60-79	70	4.6
Deaths reported in ages: 80 and over	136	16.2
Cumulative intensive care*	234	3.8
Cumulative hospitalized*	786	12.6
Number of resolved** cases	2,574	41.3

<sup>\*</sup> These refer to all hospitalized or ICU admitted cases, not cases that are currently hospitalized or in ICU.

<sup>\*\*</sup> Cases that are 14 days past symptom onset (if available) or 14 days past the episode date (for cases for whom the public health unit investigation is complete) are classified as resolved for non-fatal cases that are not currently listed as hospitalized. Cases are also classified as resolved if the case is reported as "recovered" in iPHIS.

## Geography

Figure 3. Confirmed cases (n=6,237) of COVID-19 by public health unit: Ontario, January 15, 2020 to April 9, 2020

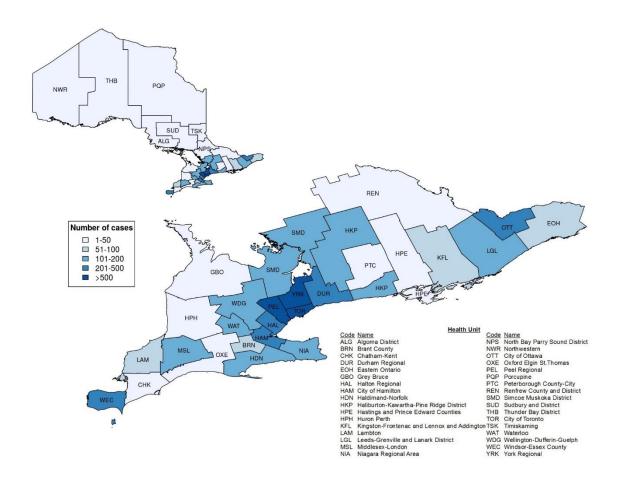

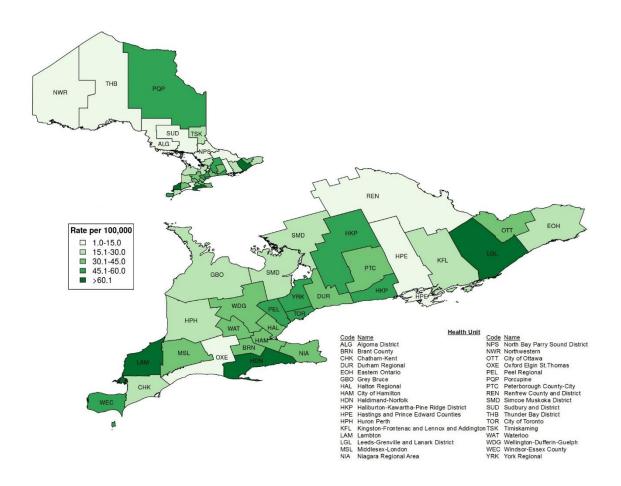

Figure 4. Rate of confirmed cases of COVID-19 by public health unit: Ontario, January 15, 2020 to April 9, 2020

### Outbreaks in Institutions and Public Hospitals

Table 4. Confirmed COVID-19 outbreaks reported in long-term care homes and hospitals and total number of associated cases: Ontario, January 15, 2020 to April 9, 2020

Indicator	Long-Term Care Homes	Hospitals
Number of confirmed COVID-19 outbreaks	73	17
Total number of cases*,** reported as part of the confirmed COVID-19 outbreaks	931	90
Cases reported among residents/patients	560	50
Cases reported among staff	366	40
Total number of deaths*,** reported as part of the confirmed COVID-19 outbreaks	99	8
Deaths reported among residents/patients	98	8
Deaths reported among staff	0	0

<sup>\*</sup>Includes all outbreak-related cases and deaths, regardless of whether the case was laboratory confirmed (deaths among non-laboratory confirmed cases reported here are not included in Table 3).

<sup>\*\*</sup>May include cases and deaths other than residents/patients or staff, such as volunteers. As a result, the total number of cases and deaths may be greater than the number of cases and deaths reported in residents or staff.

#### **Technical Notes**

#### **Data Sources (Case Data)**

- The data for this report were based on information extracted from the Ontario Ministry of Health (MOH) integrated Public Health Information System (iPHIS) database, as of **April 9, 2020** at **4 p.m**.
- iPHIS is a dynamic disease reporting system, which allows ongoing updates to data previously entered. As a result, data extracted from iPHIS represent a snapshot at the time of extraction and may differ from previous or subsequent reports.
- Ontario population projection data for 2020 were sourced from Ontario Ministry of Health, IntelliHEALTH Ontario. Data were extracted on November 26, 2019.

#### **iPHIS Data Caveats:**

- The data only represent cases reported to public health and recorded in iPHIS. As a result, all
  counts will be subject to varying degrees of underreporting due to a variety of factors, such as
  disease awareness and medical care seeking behaviours, which may depend on severity of
  illness, clinical practice, changes in laboratory testing, and reporting behaviours.
- Only cases meeting the confirmed case classification as listed in the MOH <u>COVID-19 case</u> definition are included in the report counts.
- Case episode date is based on an estimate of the best date of disease onset. This date is
  calculated based on either the date of symptom onset, specimen collection/test date, or the
  date reported to public health.
- Orientation of case counts by geography is based on the diagnosing health unit (DHU). DHU
  refers to the case's public health unit of residence at the time of illness onset and not
  necessarily the location of exposure. Cases for which the DHU was reported as MOH (to signify a
  case that is not a resident of Ontario) have been excluded from the analyses.
  - GTA health units include: Durham Region Health Department, Peel Public Health, Toronto Public Health and York Region Public Health
- Exposure type is determined by examining the exposure and risk factor fields from iPHIS to determine whether a case travelled, was a contact of a case or neither. A hierarchy has been applied as follows: Travel-related > Close contact of a confirmed case > Community transmission > Information pending.
- Deaths are determined by using the outcome field in iPHIS. Any case marked 'Fatal' is included in the deaths data.
- Cases for which the Disposition Status was reported as ENTERED IN ERROR, DOES NOT MEET DEFINITION, DUPLICATE-DO NOT USE, or any variation on these values have been excluded.

COVID-19 in Ontario: January 15, 2020 to April 9, 2020

# Appendix A

Table 1. Confirmed cases (n=6,237) of COVID-19 by public health unit: Ontario, January 15, 2020 to April 9, 2020

Public Health Unit Name	Cases	Rate per 100,000 population
Algoma Public Health	9	7.9
Brant County Health Unit	61	39.3
Chatham-Kent Public Health	18	16.9
City of Hamilton Public Health Services	202	34.1
Durham Region Health Department	307	43.1
Eastern Ontario Health Unit	52	24.9
Grey Bruce Health Unit	31	18.2
Haldimand-Norfolk Health Unit	106	92.9
Haliburton, Kawartha, Pine Ridge District Health Unit	110	58.2
Halton Region Public Health	258	41.7
Hastings Prince Edward Public Health	24	14.2
Huron Perth Public Health	29	20.8
Kingston, Frontenac and Lennox & Addington Public Health	52	24.4
Lambton Public Health	100	76.4
Leeds, Grenville & Lanark District Health Unit	146	84.3
Middlesex-London Health Unit	170	33.5
Niagara Region Public Health	198	41.9
North Bay Parry Sound District Health Unit	6	4.6
Northwestern Health Unit	9	10.3
Ottawa Public Health	472	44.8

COVID-19 in Ontario: January 15, 2020 to April 9, 2020

Public Health Unit Name	Cases	Rate per 100,000 population
Peel Public Health	811	50.5
Peterborough Public Health	50	33.8
Porcupine Health Unit	38	45.5
Public Health Sudbury & Districts	28	14.1
Region of Waterloo Public Health and Emergency Services	195	33.4
Renfrew County and District Health Unit	12	11.0
Simcoe Muskoka District Health Unit	120	20.0
Southwestern Public Health	28	13.2
Thunder Bay District Health Unit	22	14.7
Timiskaming Health Unit	7	21.4
Toronto Public Health	1,581	50.7
Wellington-Dufferin-Guelph Public Health	131	42.0
Windsor-Essex County Health Unit	252	59.3
York Region Public Health	602	49.1
Ontario	6,237	42.0

Table 2. Confirmed cases (n=1,063) of COVID-19 with travel history\* by location: Ontario, January 15, 2020 to April 9, 2020

Location travelled to**	Cases
United States	359
United Kingdom	106
Cruise	58
Mexico	58
Spain	46
France	37
Germany	35
Quebec	31
Portugal	26

Location travelled to**	Cases
State of Palestine	1
Sweden	1
Tahiti	1
Uganda	1
Yukon	1

<sup>\*</sup>Travel within the 14 days prior to symptom onset.

<sup>\*\*</sup> Cases may report travel exposures for more than one country, or may report travel as a risk factor without specifying the location. Because of this, the sum of the counts in this table may not add to the number of cases with travel exposure.
