

AUGUST 2020

## MLAS Release 2.5.15 Upgrade Alert

Updated versions of the Mining Lands Administration System (MLAS) are tested and installed regularly as part of our ongoing efforts to bring you one of the most comprehensive mining lands management systems in the world. The following applications and/or functions have been improved or newly implemented:

### Assessment Work Updates:

- Users can now distribute assessment credits through a multipart disposition (LEA, PAT, MLO or ELO) by using only the part that completes the spatial contiguity. Users are no longer required to choose all parts of the disposition.

### Early Exploration Updates:

- Users now have the ability to amend selected mining lands tenure after the submission of an early exploration plan and permit. This upgrade allows the user to add to or remove tenures from the submission before it is validated for circulation.

### Claim Management Updates:

- The e-mail notices a claim holder receives for 10-day and 30-day impending forfeitures have been enhanced. The claim holder will now receive only one e-mail listing the claims, their due dates, ownership, work required and townships. For example, if someone holds 100 per cent of six claims and 50 per cent of four claims, all with the same due date, they will receive two separate e-mails, one e-mail for the claims with 100 per cent ownership and one e-mail for the claims with 50 per cent ownership.

### Map Viewer Updates:

- The two print function disclaimers have been re-worded and updated.
- Scaling has been added to the labels for the provincial grid cells.
- Township, Administrative and MNRF District information is now incorporated in PDFs when printing within the Geo-Claims Map function.

- Print Geo-Claims Map now shows user mark-ups when the PDF is created and printed.
- The AMIS layer data has been updated.
- A note has been added to the bottom of the MLAS map viewer disclaimer page instructing users to scroll down and click on either "I Accept," or "I Decline".
- The map tips for the "plans and permits" function has been revised to provide greater clarity.

**Please note:** Several internal administrative functions have been enhanced to assist staff members provide better customer services.

### **For More Information**

If you have any questions about this matter call the Mining Lands Section at 1-888-415-9845 or email us at [pro.ndm@ontario.ca](mailto:pro.ndm@ontario.ca).
