Public Health Agencies

Public Health Agency of Canada | canada.ca

COVID-19 is a serious health threat, and the situation is evolving daily. The risk varies between and within communities, but given the number of cases in Canada, the risk to Canadians is considered **high**.

- [2019 novel coronavirus: outbreak update](#)
 - **August 31, 2021**, 19:00 EST, **1,499,165** cases of COVID-19 have been confirmed in Canada and there are currently **31,307** active cases. **26,932** people have died of COVID-19. Individuals tested: **40,539,552**.
 - **August 30, 2021**, 19:00 EST, **1,496,256** cases of COVID-19 have been confirmed in Canada and there are currently **31,095** active cases. **26,918** people have died of COVID-19. Individuals tested: **40,476,190**.
 - **August 29, 2021**, 19:00 EST, **1,493,521** cases of COVID-19 have been confirmed in Canada and there are currently **33,525** active cases. **26,901** people have died of COVID-19. Individuals tested: **40,405,800**.
- [COVID-19 vaccination in Canada](#)
 - As of **September 1, 2021**, 11:00 EST, there have been **53,318,439** vaccine doses administered.
 - As of **August 31, 2021**, 19:00 EST, there have been **53,257,056** vaccine doses administered.
 - As of **August 31, 2021**, 11:00 EST, there have been **53,224,213** vaccine doses administered.
- [Statement from the Chief Public Health Officer of Canada \[08-27-2021\]](#)
 - “Following [Health Canada's authorization of the Moderna COVID-19 vaccine for adolescents 12 years of age and older](#), the National Advisory Committee on Immunization (NACI) released [updated recommendations](#) on the use of mRNA COVID-19 vaccines in adolescents 12 to 17 years of age. In May 2021, NACI recommended vaccination of adolescents with Pfizer-BioNTech COVID-19 vaccine following regulatory approval and is now including the Moderna COVID-19 vaccine in these adolescent vaccination recommendations. Clinical trial findings suggest the Pfizer-BioNTech and Moderna mRNA COVID-19 vaccines provide very good protection against symptomatic COVID-19 infection and have a favourable benefit versus risk profile in adolescents 12 years of age and older.”

- [WHO, Germany open hub for pandemic and epidemic intelligence in Berlin](#) [09-01-2021]
- [Director-General's introductory statement at the MSC in Berlin breakfast discussion](#) [09-01-2021]

- “What lessons can we learn from the pandemic, and what changes must we make to prevent the next one? As you know, there have been several reports and reviews seeking to answer those questions. There are literally hundreds of recommendations, but as we have studied them, we see four core themes. First, all of the reports recognize the need for better systems and tools to prevent, prepare for, detect and respond rapidly to epidemics and pandemics. [...] Second, all of the reports recognize the need for better financing for national and global preparedness and response, including for global goods such as vaccines. [...] Third, all of the reports recognize the need for better global governance of pandemic preparedness and response. [...] And fourth, all of the reports recognize the need for a strengthened, empowered and sustainably financed WHO at the centre of the global health architecture.”
