## EXPLANATORY NOTE

### SCHEDULE 1 BUILDING BROADBAND FASTER ACT, 2021

The Schedule enacts the *Building Broadband Faster Act, 2021*. The purpose of the Act is to expedite the delivery of broadband projects of provincial significance. The Act applies with respect to broadband projects that are designated by regulation.

Provisions are made to require co-operation from electricity distributors and transmitters to complete work that is necessary for the deployment of a project. The Minister may give a distributor or transmitter a notice requiring the completion of work. A notice may be given only if the Minister has determined that the distributor or transmitter has not met a prescribed requirement relating to when something must be done. The proponent of the project and the distributor or transmitter are required to enter into negotiations to co-ordinate the work. Provision is made for the apportionment of costs of the work. If the distributor or transmitter fails to complete the work the Minister may order them to do so or may authorize the proponent to carry out the work. A distributor or transmitter who fails to complete the work is also required to compensate the proponent.

Provisions are made for requiring municipal service and right of way access. The Minister may give a municipality a notice of what the Minister has determined is required. The proponent of the project and the municipality are required to enter into negotiations to agree on terms. If terms cannot be agreed upon, the Minister may make a municipal service and right of way access order. A municipality is required to compensate the proponent if the municipality fails to negotiate as required or fails to comply with a municipal service and right of way access order. If a municipality fails to comply with a municipal service and right of way access order the Minister may authorize a person to do the work required under the order and the municipality is required to compensate the Minister for related costs incurred by the Minister.

Provisions are made relating to notifications requiring the location of underground infrastructure under the *Ontario Underground Infrastructure Notification System Act, 2012* for a proposed excavation or dig that relates to a broadband project. ~~If the required work is not done within 10 business days, the Minister may authorize a person to do the proposed excavation or dig.~~ The required work must be done within 10 business days. The proponent of a project may claim compensation for prescribed losses or expenses if the required work is not done properly.

Provisions providing for the following are also included:

1. The delegation of certain functions to the Ontario Infrastructure and Lands Corporation.
2. Administrative penalties.
3. The preclusion of certain causes of action.
4. Consequential amendments to other Acts.

### SCHEDULE 2 ONTARIO ENERGY BOARD ACT, 1998

The Schedule amends the *Ontario Energy Board Act, 1998*.

Notably, the Act is amended by adding a new Part VI.1 (Electricity Infrastructure). The Part applies with respect to the development of, use of or access to electricity infrastructure that is wholly or partly for a purpose other than the generation, transmission, distribution, consumption, sale or demand management of electricity, if the development, use or access is specified by regulations made under the Part. The term “electricity infrastructure” is defined in section 104.1 of the Part. Section 104.5 identifies new objectives of the Ontario Energy Board in relation to its powers and duties under the Part.

The new Part VI.1 consists primarily of a broad regulation-making authority to identify and govern the electricity infrastructure development, use and access to which it applies, in section 104.3. In addition, section 104.4 provides discretion for the Minister of Energy, Northern Development and Mines to compensate, in accordance with the regulations, transmitters, distributors and any other persons licensed under Part V of the Act that may be specified by the regulations for any lost revenue arising from the application of the Part. Such compensation would be paid out of money appropriated by the Legislature for the purpose. Complementary amendments are made to section 42 of the *Electricity Act, 1998*.

Other amendments made to the *Ontario Energy Board Act, 1998* include the following:

1. Amendments to sections 71 and 88 of the Act to expressly provide that the restriction on transmitter and distributor business activities in subsection 71 (1) of the Act is subject to regulations that may provide otherwise.

2. A new subsection 78 (5.0.0.1) of the Act, which provides that specified payments that transmitters and distributors may be required to make under the *Building Broadband Faster Act, 2021*, set out in Schedule 1 to the Bill, shall not be considered by the Ontario Energy Board in its setting of electricity rates.

Finally, a number of housekeeping amendments are made to the *Ontario Energy Board Act, 1998*, such as repealing the definition of “designated consumer” in section 56 since the term is no longer used in the Act. A consequential amendment is made to the *Private Hospitals Act*.

### **SCHEDULE 3 PLANNING ACT**

The *Planning Act* is amended to provide that ministerial zoning orders made under section 47 are not required and are deemed to never have been required to be consistent with policy statements issued under subsection 3 (1). However, any part of such an order that applies to land in the Greenbelt Area is and always has been required to be consistent with a policy statement issued under subsection 3 (1).
