

Help Protect Ontario's Fisheries

Ontario has new Bait Management Zones (BMZ) to help protect our lakes and rivers from harmful invasive species and disease.

Use baitfish and leeches from the zone where you are fishing. You can share baitfish and leeches when fishing with other anglers.

Fishing at home? Harvest or purchase your baitfish and leeches.

Fishing outside the zone where you live? Purchase your baitfish and leeches. Keep a legible receipt and properly dispose of unused bait within two weeks.

Don't transport baitfish and leeches between zones.
