Age	Number of doses in vaccine series	Time between doses	Time between last dose and boosters
5-11	3	eight weeks	N/A
12-17	3	eight weeks	6 months
18-49	3 + 2 booster	eight weeks	4.5 months
50+	3 + 2 booster	eight weeks	4.5 months

Currently, vaccines are available across the territory. Nunavut is presently offering both the Moderna Spikevax and the Pfizer-BioNTech Comirnaty mRNA vaccines. Call your local health centre or public health office to make an appointment or to inquire about walk-in clinic times. Following all vaccine appointments, patients should receive a copy of their Proof of Vaccine Certificate. If you have not received a Proof of Vaccination Certificate email vaccineexemptions@gov.nu.ca to obtain one.
