5. These regulations come into force on June 13, 2009.

EXPLANTORY NOTES

SECTIONS 1 to 4 correct inaccuracies in the classifications of the Millman Road in Burlington. The amendments to the classifications reflect the actual conditions of the road.

- The Millman Road in Burlington, approximately 2.0 km in length, runs between the Irishtown Road (Route 101) and the Burlington Road (Route 234).
- The northern portion of the road is classified as a local unpaved road (C-3) for a distance of 0.3 km from the intersection of Route 101, the Irishtown Road. This section of the road is paved, and is also being maintained on a year round basis. As a result, this portion of the road should be classified as C-2.
- The paved portion of the road is classified as a local paved road (C-2) from the intersection of Route 234, the Burlington Road, to the intersection of Route 101 in Irishtown. The paved portion extends approximately 165 meters and is bounded on both sides by property formally known as Woodleigh Replicas.
- The majority of the road is classified as a Seasonal Highway, beginning 0.3 km from the intersection of Route 101 to the intersection of Route 234, a distance of 1.7 km. This portion of the road is also classified as a Scenic Heritage Road. The correct length of seasonal highway is approximately 1.5 km and is bounded at both ends by paved sections that will now be correctly identified as Local paved roads (C-2).
- The southern, paved portion of the road connecting to Route 234 is classified both as Local Class 2 as well as a Seasonal Highway, and is corrected to reflect the actual conditions of the road.
- The Scenic Heritage portion of this road has been incorrectly identified as being 1.5 km in length while it was originally intended to extend only to the southern end of the treed canopy, a distance of 1.34 km.

SECTION 5 provides for the commencement of these regulations.
